

// PRODUCT INFORMATION

Product name Chalk Marker 150

Product description

The chalk markers 150 are ideal for bold, decorative lettering in bright colours, producing clearly legible results. The chalk markers with the 5-15mm chisel tip have extremely good coverage and are suitable for writing on magnetic glass boards, smooth glass and almost all sealed surfaces. The water-based liquid chalk can be wiped off with a damp or dry cloth. We recommend testing the marker in an inconspicuous place to check that it wipes off completely.

Instructions for use

Valve-action chalk markers. Shake well before use and, with the straight edge parallel to the writing surface, pump the nib slowly several times until it fills with liquid chalk. Replace the lid after every use. Repeat as necessary. Store flat or upright with the lid pointing upwards.

Composition Water-based liquid chalk

Contents 25 g

Safety guidelines

There is no health risk if the marker is used properly and for its intended purpose.

Irritation after skin contact Wash the skin with soap and water.

If ink is swallowed Wash out the mouth thoroughly. If feelings of discomfort persist, see a doctor.

If ink gets in the eye Rinse thoroughly until the irritation eases. If feelings of discomfort persist, see a doctor.

Smell If used for its intended purpose, the ink does not release dangerous vapours.

General note

The above information applies to the finished product and the ink it contains (a small amount). The information may not be accurate for larger amounts of ink in bulk containers.
